SUMMARY

Experienced technology professional with a diverse background in enterprise client success, data analytics, agile product development and cross-functional technical leadership. Seeking to leverage my passion for SaaS and web development to scale tech companies for rapid growth in an age of unprecedented AI advancement.

CORE STRENGTHS

- 10+ years of proven success in client-facing, high-growth SaaS start-up environments
- 2+ years of professional JavaScript experience in agile sprint cycles, embedded on a Fortune 500 client's team
- Track record of influencing key enterprise client stakeholders and driving product adoption leading to renewals and upsells
- 1 year of Agile/Scrum CSPO and CSM experience in the financial technology industry
- Strong passion for continuous learning and self-improvement, keeping up with the latest advancements in AI and tooling

TECHNICAL SKILLS

Project Management: Atlassian Jira / Confluence, Agile Scrum, Salesforce, Trello, Balsamiq, Excel, Access, PowerPoint, Power BI, CSM and CSPO methodologies

Proficient / Most-Used: JavaScript, HTML, CSS, SQL, React, ChatGPT, Claude, Gemini, GitHub Copilot

Familiar: Angular, TypeScript, Python, MongoDB, Node, Express, VBA, RESTful APIs, React Native, Bootstrap, jQuery, Git, GitHub, Heroku, Firebase

PROFESSIONAL EXPERIENCE

Quantum Metric Colorado Springs, CO (remote)
Customer Success Engineer *Aug 2024 – present*

- Led development efforts of a real-time intervention custom JavaScript integration for a top 5 US commercial bank and validated it with A/B testing on a tight timeline, driving a $2M net credit loss reduction over the first year in production.
- Embedded with a Fortune 500 client's team, participating in their internal agile sprint cycles and partnering with the client's developers and leadership to secure approvals for projects and lower-environment access for testing.
- Manage the implementation, onboarding and technical configuration for a portfolio of Tier 1 and Tier 2 enterprise clients.
- Contributed to $1.8M in upsell opportunities for an enterprise healthcare client, now in the final stages of transitioning to a Tier 1 account as a result.
- Architect custom JavaScript functions to capture data analytics and satisfy complex use cases across post-sales / adoption cycles, and contribute reusable code snippets to our internal CSE GitHub repository.

Tricentis Atlanta, GA (hybrid)
Platinum Support Representative *Sep 2023 – Aug 2024*

- Provided technical analysis, real-time troubleshooting and consultative services for our highest tier of enterprise clients.
- Routinely outpaced our most aggressively expedient SLAs, reducing escalations by 22% and decreasing mean time to resolution by 16% by mid-2024.
- Collaborated with CSMs, support engineers, product managers and software developers to champion our clients' holistic CX journeys.

BrightLink Roswell, GA
SaaS Technical Support Specialist *Nov 2020 – Sep 2023*

- Drove customer adoption of our Clarus product via Jira ticketing systems, requirements gathering calls and live training sessions (Webex / Google Meet / Zoom / Microsoft Teams).
- Resolved highly technical inquiries requiring working knowledge of HTML, CSS, SQL and API integrations with 3rd party vendor systems.
- Exceeded company SLA goals in 2H 2021 while BrightLink was launching more than 2X the number of net new clients compared to 2020.

eVestment (a NASDAQ company) Atlanta, GA

Professional Services Analyst *Mar 2019 – Apr 2020*

- Successfully onboarded dozens of investors, consultants, and asset managers to our Analytics platform via live Webex workshops.
- Managed end delivery of a market intelligence POC that ultimately grew into a $10k/report revenue generator in 2H 2019.
- Launched a data gap analysis initiative that helped procure funding for a standalone Power BI data model exclusively for the PS team.

Product Owner *Aug 2017 – Aug 2018*

- Managed all aspects of Agile Scrum ceremonies including sprint planning, reviews, product demos, retros and daily stand-ups.
- Created hundreds of user stories in Jira, prioritized backlog with developers and hosted discovery sessions to define our MVPs.
- Maintained detailed decision logs and sprint artifacts in Confluence, increasing stakeholder visibility by 35% (page views).

Client Service Analyst *Dec 2015 – Aug 2017*

- Successfully resolved over 2,000 client inquiries via daily telephone, email, live chat, and Webex interactions.
- Solicited missing data from at-risk clients by engaging in proactive outreach campaigns, increasing DB population by ~6% in 2H 2017.
- Built VBA macros in Excel that reduced the average processing time of Omni usage reports by > 50%.

United Parcel Service Atlanta, GA

Corporate Segment Marketing Specialist *Aug 2013 – Dec 2015*

- Managed weekly distribution of thousands of sales leads to Account Executives in the field using Microsoft Access and SQL databases.
- Reviewed and published over 100 user-submitted documents to our internal knowledge sharing platform.
- Proactively developed a new process for assigning industry classification to 20+ major accounts each month which was adopted by 3 segment marketing teams.

PROJECTS

All repositories available at https://github.com/kdaysal

- **myFlix (React CRUD app):** Single-page movie web app built with React.js, Node.js and Express. Uses a REST API hosted on Heroku, data storage via MongoDB Atlas and JSON Web Token authentication for security.
- **Meet (PWA):** Progressive Web App built with React.js that displays tech meetup events from the Google Calendar API. Developed with TDD (Jest, Cucumber, Puppeteer), OAuth2 and AWS Lambda.
- **Chat (React Native app):** Mobile chat app built with React Native, Expo and GiftedChat, with image and location sharing and Firebase cloud storage.
